

CONDUCTOR CRUSHED BY CAR

Same Was Caught Between It and a Leaning Telegraph Pole.

Andrew Lane, a Long Island freight conductor, was crushed between a freight car and a telegraph pole at Riverhead yesterday. He is in St. Mary's Hospital, Jamaica. It is feared his back is broken and that he will die. Lane had been shunting cars. He was climbing upon one as it passed the pole, which leaned at an angle of about 45 degrees. It swept him off the car. Fortunately no other car was following when he ran over him.

SURE WAY TO GET RID OF DANDRUFF

2nd Itching Scalp and Stop Falling Hair—At Once.

There is one sure way that never fails to remove dandruff completely and that is to dissolve it. This destroys it entirely. To do this, just get about four ounces of plain, ordinary liquid arvon; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips.

By morning most, if not all, of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you may have. You will find, too, that all itching and digging of the scalp will stop instantly, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better. If you want to keep your hair looking rich, do by all means get rid of dandruff, for nothing destroys the hair so quickly. It not only starves the hair and makes it fall out, but it makes it stringy, straggly, dull, dry, brittle and lifeless, and everybody notices it. You can get liquid arvon at any drug store. It is inexpensive, and four ounces is all you will need. This simple remedy has never been known to fail.

W.B. CORSETS

Give Fashion's lines to every figure. Bustless, hipless—almost no boning, give flexibility which allows graceful, unrestrained movements in any posture. Sheath-like in fit, they mold the figure into slender siph-like lines.

NEW YORK TO HAVE WORLD'S GREATEST CANCER HOSPITAL

General Memorial Hospital and Cornell University to Co-operate in Big Work.

A MILLION IS DONATED.

Large Supply of Radium Will Be a Feature of Institution's Equipment.

Through the co-operation of the General Memorial Hospital and Cornell University Medical College, New York is to have the largest and best equipped cancer hospital in the world. More than \$1,000,000, exclusive of the value of the hospital buildings, is already at hand to form the basis of the institution, which will also have a large supply of radium at its command and the results of years of research work to draw on.

Allan A. Ryan, son of Thomas F. Ryan, recently gave \$50,000 of the \$1,000,000 fund, but the authorities of the hospital and college are reticent about the names of the donors of the entire amount. Dr. James Douglas, copper millionaire and philanthropist, has not only contributed a large amount, but has also turned over to the General Memorial Hospital the use of his one-half interest in the radium mine of Colorado.

Formal announcement of the relations to be established between the pathological laboratories of the medical college and the wards of the hospital will be made Sunday by the trustees of the hospital, and it is likely some of the contributors to the fund also will be named.

The hospital will retain its present board of trustees, but some of the practicing staff are to be changed, experts in cancer research to take their places. The actual management of the hospital and treatment of cancer will be under the charge of the faculty of the medical college, of which Dr. William M. Polk is dean and Dr. James Ewing professor of pathology. It is not intended at present to increase the size of the hospital buildings. However, ninety beds will be provided, more than either of the two largest cancer hospitals in the world now has.

The latest devices for radium, and other special apparatus, will be provided, and in addition the pathological laboratories of the medical college at Twenty-eighth street and First avenue will be available. It will be the policy of the General Memorial Hospital to take only those cases open to treatment or of interest in study. The active operating wards of the hospital, however, are to be open to all cancer cases. One of the main objects of the trustees is to find some way of curing internal cancer, which cannot now be reached by radium. The question of turning over the General Memorial Hospital for cancer cases exclusively has been in mind for some time.

FOUR GAS VICTIMS SAVED BY PULMOTOR

Coal Fumes Overcome Sleeping Patrons and Employees of Turkish Bath House.

Four men were overcome by coal gas during the night as they slept in Max Kaminsky's Turkish bath house at No. 277 East Ninety-eighth street. They were discovered about 6 o'clock this morning by a man who went into the bath house. A policeman called Dr. Bowman from Reception Hospital, and the four were revived with a pulmotor and sent home.

The men were Morris Pappas of No. 118 East One Hundred and Fourth street, Benjamin Shost of No. 125 East One Hundred and Eleventh street, Michael Jacobson of No. 588 East Ninety-ninth street and Charles Jacobson, a rubber in the bath house. A fifth man was found by the coal gas, but revived when taken into the fresh air.

Little Girl Killed by Auto. Five-year-old Mollie Melner was run down last night near her home, No. 518 Bergen avenue, Jersey City, by an automobile owned and driven by Harold Cummings of No. 188 Montclair avenue, Montclair. Mr. Cummings quickly stopped and, lifting the child into his car, raced to City Hospital, where she died a few minutes after being admitted. The police arrested Mr. Cummings, but later paroled him for a hearing to-day.

GEORGE W. CHAUNCEY QUILTS AS BANK HEAD

Leaves Active Presidency of Mechanics of Brooklyn After Service of Thirty-One Years.

Transferring a service which has extended over thirty-one years, George W. Chauncey to-day relinquished the Presidency of the Mechanics Bank of Brooklyn, one of the oldest and best-known institutions of that borough. It is at his own request that he lays down the responsibilities of the active management of the bank, as the task has of late told

somewhat upon his health and he desires an opportunity for rest and leisure. The directors, however, are unwilling that he shall completely sever his connection with the institution, and they created a new office—that of Chairman of the Board of Directors—and unanimously elected Mr. Chauncey to the chair.

As a successor to Mr. Chauncey the directors have elected Charles G. Balmanno, for many years vice-president and cashier. To assist Mr. Balmanno in the management of the active affairs of the bank Walter Wolf, for a number of years Deputy Superintendent of Banks, was elected to the vacancy in the executive force. The Mechanics Bank was established in 1852, and during its existence it has had only four presidents, including Mr. Chauncey, whose father was one of his predecessors.

DROWNED IN BATHTUB.

BRISTOL, Tenn., May 1.—A special from Columbia, Ga., says that Mrs. Bernice Tipton, thirty-five years old and sister of H. M. Robinson of Bristol, capitalist and railroad owner, was found dead in the bathtub of her home in that city. Death resulted from drowning. She is supposed to have become unconscious while bathing.

The body will be taken to the old home at Greenville, Tenn., for burial. She is survived by her husband and four small children.
